

Squire Canyon Community Service District members, January 20th, 2026

Dear neighbors,

This letter is to inform you that SCCSD has retained a contractor to conduct a low and high altitude drone video of Indian Knob and Squire Canyon Roads on **Saturday, Jan 31st time: 9am**. The drone videos will provide a comprehensive, multi-layer analysis of the road infrastructure and will be used to establish the existing road baseline conditions and help prioritize future road repair projects. We expect the filming to last about 2 hours.

High-altitude footage (30-250 meters) will offer a bird's -eye view for mapping. It will help in calculating the volume of materials needed and evaluate the overall site.

Low-altitude footage (up to 30 meters) will provide high resolution detailed images (cracks, potholes, pavement distress, etc.) required for precise inspections and estimates of road repairs.

Both allow for safer close-up inspection of dangerous, high risk or hard to access areas.

If you have any questions, concerns please contact SCCSD-www.squirecanyoncsd.com or me directly at: squireneighbor@gmail.com
